## Summary

Hi, thanks for taking a look at my resume! I learned the basics of Graphic Design in high school, and I haven't stopped learning about them since. More recently I'm half way finished a Full-Stack Web Development Bootcamp at CareerFoundry. There I've learned how to use HTML, CSS, and JavaScript, and I'm even starting to work with React and Angular! It's very rewarding, I feel I would be very successful in a Web Developer position, I have plenty of skill, a can-do attitude, a keen attention to detail. I'm great with teamwork, communication, problem solving, and I'm creative to boot.
